ProScore is a thick client running on a PC (Win7/Win8). The sw integrates with a MySQL database and posts both “round-by-round” points and fight results directly into the dB-table immediately after every round. Which means that viewers can follow the fights live on internet.

ProScore contains three electronic clickers (one for each judge), a computer for secretary personnel, one HDMI splitter for four displays, one controller interface that integrate clickers with the PC and one secretary Pause-clicker, for easy and rapid pausing of the fight (also see Pic 4).

ProScore is useable for both Ring sport and Tatami sport, including Point fighting (upcoming solution).

ProScore has built-in sound of Bell (round start, round stop and fight end) and a “knock on wood” sound for end of pause.

ProScore is part of a module system.

The ProScore module solution consist primarily of Admin Portal, Team Portal, Weight in Portal, Result report. These Portals are all (except Result report) log in protected and placed on the internet.

AdminPortal: This is where the events is Set-up and where enrollment list are treated. Here we also set up the event category by category. (i.e. event schedule, which weight class on which ring/tatami, time settings, round settings and so on...)

TeamPortal: This is where teams/clubs can open an account and do a one-time storage of their participants for enrollment entries. And of course, this Portal also contains an enrolment-service.

Weight in Portal: This is as the name says used for weight in. Only the persons that passes this point will be set up for the event.

Result report: This will give you a result list, fight-for-fight result and round-by-round points and a Pyramid print including results.

We also have several more modules/services, which is in use in Norway, i.e.:

License Service: The system is set up to demand a paid license/assurance in order to been able to enroll.

Medical upload: A solution for uploading and approval of medical certificates. (Then you do not have to show a printed copy on every event, as the approval will show up in weight-in API).

Judge Portal: To collect and report all licensed judges including necessary data.

Event Judges: Registries of event judges including logistic (you pick judges from JudgePortal).

EventRun: For manually online registration of scores (if ProScore not in use).

The button "Select Tatami/Ring" then get active and clickable. In the window that opens select Tatami/Ring and category. The pop-up will then close and you can select weight class

The sequence shows the following steps:

- The **Select Competition** button is active.
- The **Select Tatami/Ring** button becomes active and clickable. Below it, the **Only show Finals** checkbox is checked, and the **Weight Class** section is visible with radio buttons for H+89KG, H-69KG, H-74KG, H-79KG, and H-89KG.
- A dialog box titled "Matte Valg" appears, allowing selection of **Select Tatami / Ring** (A, B, C, D) and **Select Category** (LC, SC). The **Select** button is at the bottom.

Then you can select the fight #
